

Dashboard

[Capgemini]

Sabarinathan R

Objective

01

In Today's world, there isn't a proper dashboard for bank transactions and there isn't a clear view of our transaction history to see the balance amounts we have at the end of each month and each year. If we have some application to view this it would be better.

Proposed Solution:

- I have proposed a solution by creating an application to see the balance amount at the end of each month it can be viewed in various charts.
- You can view it in bar, line, Pie, Polar and even Doughnut chart. Since it is viewed in various charts you could easily analyse the transaction amount.

TECHNOLOGY STACK

Tools Used

- vsCode
- Postman

Library used

- React js
- Chart js

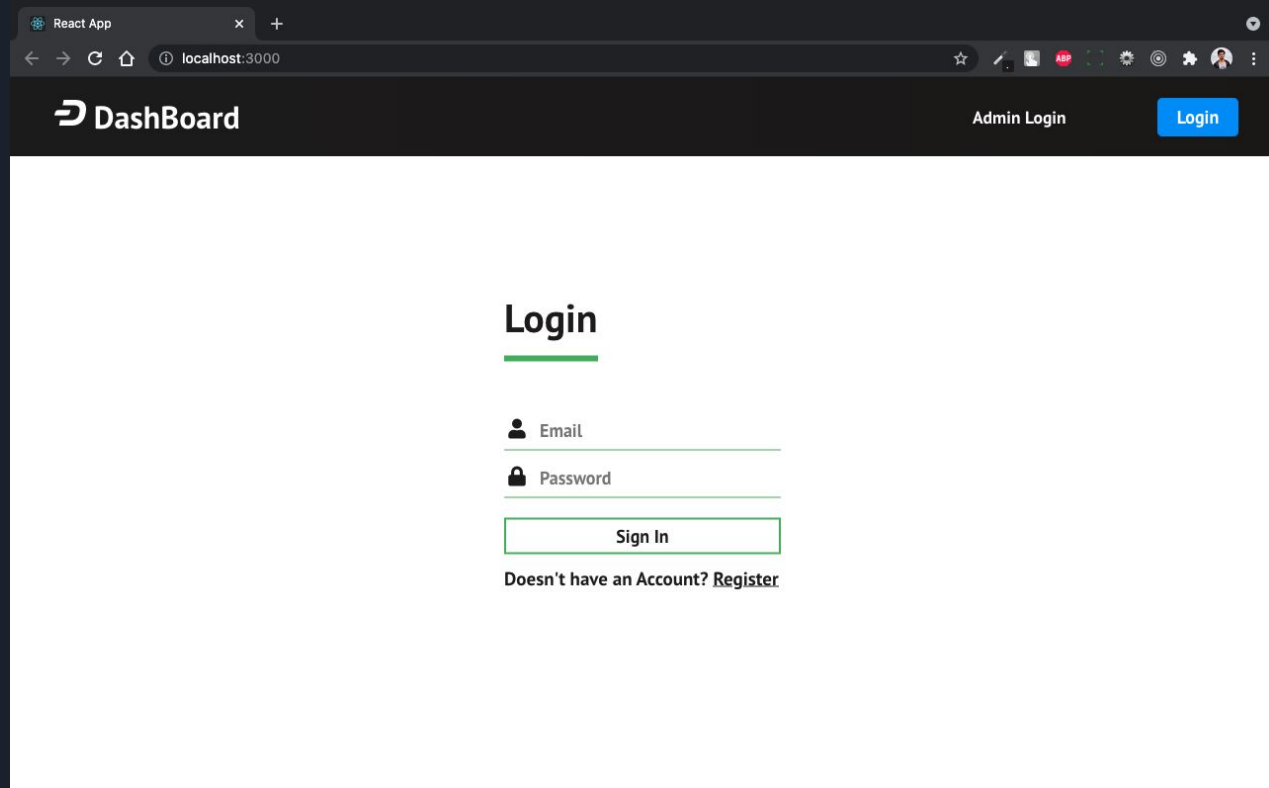

REST-API

- Node js

Database

- MongoDB

Screenshots

Bar Chart

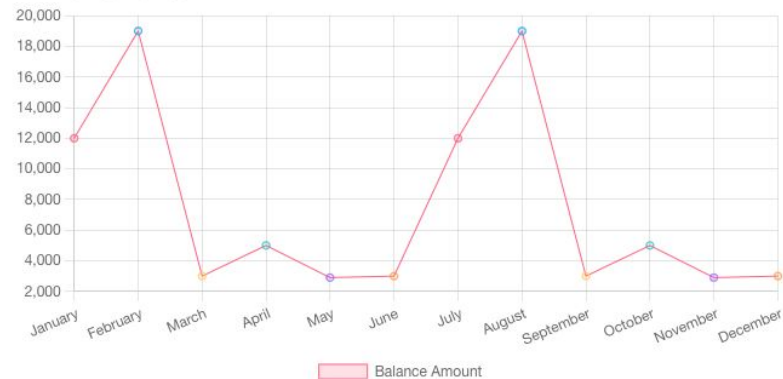

Pie Chart

January February March April May June July
August September October November December

Line Chart

Doughnut Chart

Thank You!

The background features a series of dark gray, three-dimensional rectangular planes that recede into the distance, creating a sense of depth. A light green parallelogram is positioned on one of the upper planes, and a blue parallelogram is on a lower plane, both adding a pop of color to the monochromatic scheme.
